

Explore the Raspberry Pi

Step 1: Log into the Raspberry Pi with the password: **ITlaunch**

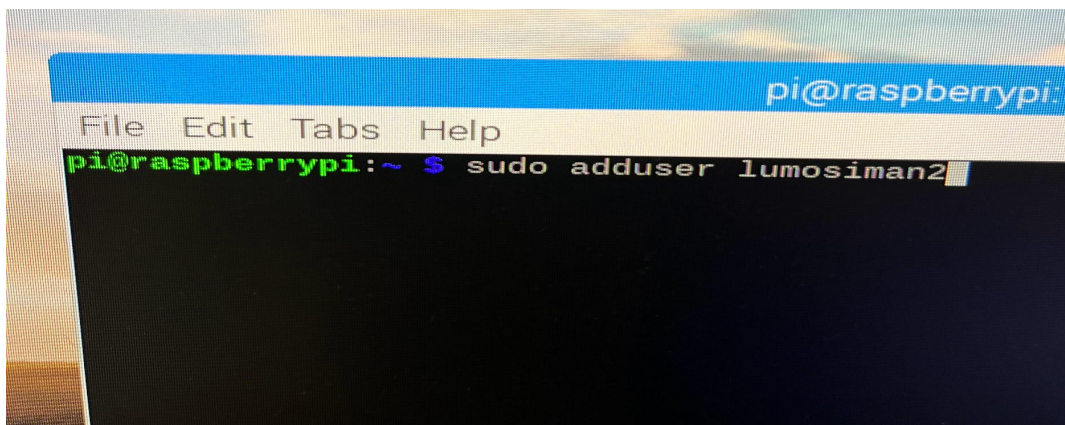

Step 2: Use the following instructions to create a new user for yourself. Your student id is fine, or anything else you can remember. **Make sure you use a username and password you can remember!!!**

Click on the little black box in the upper left to open a terminal:

In the terminal, type the following line, **replacing “lumosiman” with whatever username you choose:**

sudo adduser lumosiman2 (**<-- don't use lumosiman2**)

Then hit enter and add your password in (**it won't show what you type**). You can leave the rest of the fields blank.

Lastly, copy and paste in the following command, but **change the username to yours!**:

```
sudo usermod -aG adm,sudo,audio,video,plugdev,games,users,input,netdev,gpio,i2c,spi,pi yourusername
```

Then click on the Raspberry, click on “Shutdown” and then Log Out.

[Now log in with your new username and password and continue with the instructions...](#)

You will need to connect to the Raspberry Pi Network!!!!!!

Ask Mr. Mosiman to type in the password.

DuckDuckGo will not work!!!!!!

Go into the search settings for your browser and change the default search engine to Google

Have some fun...

Mr. Mosiman really likes blowing things up, so to earn a point for this unit, you must show Mr. Mosiman how to blow up a cube of 1000 TNT blocks (10x10x10)
